

World Living Water Systems

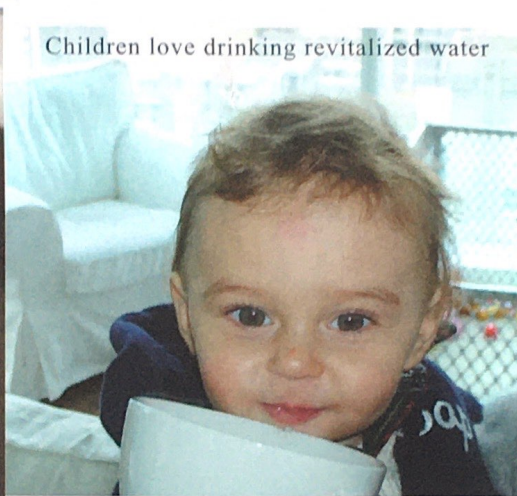

The Vortex Water Revitalizer

Revitalizes your water in the shower, kitchen tap or all of your home via the main line in your house. The Vortex Water Revitalizer runs your tap water through a double spiraling process creating a powerful vortex induced implosion. This restores the vitality in the water. The water delivers its energy to your body, plants and pets for instant absorption. Natural power for you and so good for the environment! We have models for kitchen taps, for showers, for any other filter systems, plus different sizes of whole house models, as well as commercial sized models. See the list of benefits below from using the VWR!

Children love drinking revitalized water

Some of the beneficial effects of revitalized water

- * Revitalized water is instantly absorbed by the body and is ready to perform its wonderful work in all the biological processes in your body, thus maintaining your good health.
- * Gives renewed energy to the human body and bloodstream, thereby improving the ability to provide cellular nourishment and eliminate body wastes and toxins with ease.
- * Drinking revitalized water makes you feel refreshed and energized.
- * Because it is softer, revitalized water decreases dryness and irritation of the skin.
- * In the shower you will experience how effectively it rinses off soap, giving a squeaky clean feeling!
- * When used for washing both dishes and laundry it provides better and easier results with less detergent. It makes the detergent more effective, and rinses better. Good for the environment!
- * The Vortex Water Revitalizer improves the taste, smell and look of your tap water, even the taste and smell of chlorine often disappears within minutes or even immediately.
- * It works well with any filtration system and can be installed before, or after the filter, or both.
- * Eliminates slime (bacteria build-up), and reduces mineral and rust deposits in coffee makers, cookware, humidifiers and plumbing. No more smelly kitchen rags.
- * Plants respond well, with increased and healthy growth, giving you improved, healthier crops.
- * The VWR increases the amount of dissolved oxygen in the water towards its natural level.

after being revitalized

In nature, water is alive. However, when we distribute it through miles and miles of straight and narrow pipelines, it loses its vibrant life force. Consequently the water we consume has become stagnant, which results in bacteria buildup as well as algae growth. The common solution is to add toxic chlorine to this already dead water. Is that wisdom? The VWR seems to neutralize the chlorine's negative effects. When your tap water is run through the Vortex Water Revitalizer it changes back into real water, right there in your home. This can be seen and verified by simply observing the water. The revitalized water has the water's original features intact and healthy, restoring its full range of natural qualities. Now, the water can perform all the wonderful functions we need it to do for us. VWR treated water is sparkly and clear.

Testimonials from our customers

The water is light, soft and full of oxygen bubbles. It even tastes better than bottled, distilled and carbon filtered water. The taste is crisp and filling. I feel energized after drinking a glass. It doesn't get better than this. This VWR is the best money I have ever spent. *Khumura K. Harlem, New York City USA*

"I can never thank you enough. I do not have any more trouble with my skin since I installed the VWR! I no longer have any itching and the red spots on my skin have disappeared, as well as some other spots. Now I have baby skin! Even experts and medical doctors could not find out what my skin problems were. Better late than never! After 20 years of various problems because of our water, I am healed. Thank you for the VWR!" *Emma Soriano, Paris, France.*

"I am a Registered Nurse (UK) and a Canadian Health Executive. I ran a glass full of water and could not believe that the sickening smell, which is usually present, had gone! I drank two glasses one after the other, and this from someone who never usually drinks tap water! I am very happy with the system" *Shirley Browne, RN (UK). CHE, Surrey, BC, Canada*"

A customer from a mobile home park in Washington State reported that they were the only home, which did not have to have their septic tank emptied since their sewage water was just clear. All the other homes had to pay for removal of their excess septic sewage.

Good for the environment and good for your economy!
